PROFESSIONAL SUMMARY

Technical Product Manager with 1+ year of experience owning end-to-end delivery of an enterprise InsurTech platform. Currently drive Prudential HCL's Rewards & Recognition platform from requirement gathering and BRD creation through solution design, sprint execution, and release, covering commission configuration, calculation, accounting, and payout processing via bank integration. Combines a technical background (SQL, API integration, full-stack development) with strong stakeholder management and Agile delivery skills, bridging business and engineering teams to ship scalable, business-critical solutions.

PROFESSIONAL EXPERIENCE

Technical Product Manager

FynTune Solutions Pvt. Ltd. (InsurTech) | *July 2025 – Present*

- Own end-to-end delivery of Prudential HCL's Rewards & Recognition platform, an enterprise intranet application built from the ground up, from requirement gathering through release.
- Lead requirement gathering with Prudential's business and IT stakeholders, translating needs into detailed BRDs, user stories, and acceptance criteria.
- Designed the end-to-end commission flow — rule configuration, business-logic-driven calculation, accounting-entry generation, and payout processing via bank integration.
- Defined product workflows and business rules for commission, rewards, incentives, and goal-sheet management aligned to Prudential's compensation structure.
- Coordinated with UI/UX designers and developers across design and build phases, producing wireframes and process flows in Figma to align the team pre-development.
- Ran end-to-end sprint cycles — planning, backlog grooming, and release tracking — in Jira, managing Prudential-raised issues and sprint deliverables.
- Managed ongoing stakeholder communication with Prudential's business partners and internal teams, aligning on scope, priorities, and open issues.
- Partnered with developers on API design and integration, validating endpoints against Swagger documentation.
- Tracked development via GitHub and cross-functional coordination via Microsoft Teams; maintained BRDs and stakeholder reports in Excel and Word.
- Led UAT, defect validation, and production release verification, confirming releases met business requirements before go-live.
